

# COMMUNITY NEEDS ASSESSMENT for Transport Services COLL DROP-IN ENGAGEMENT SESSION

**AN CRIDHE – COLL COMMUNITY CENTRE**

**Monday 16th March 2026 15:00-18:30**

## The future of island transport

Transport Scotland is undertaking Community Needs Assessments to inform future **ferry and air** services and investments including vessel and port projects. Consultants Stantec are undertaking the assessment for Coll. Your knowledge and experience are a crucial part of this work.

## Why are we holding these public drop-in sessions?

We've been looking closely at what data tells us about how services operate, how people use them, as well as the challenges, and we've built an initial picture of the transport connectivity issues the community faces.

**But data can only tell us so much. We want to hear directly from you.**

These drop-in sessions are your chance to:

- Tell us whether we've understood the issues correctly
- Share your first-hand experiences of using ferry and other transport services
- Highlight anything we've missed
- Discuss what better connectivity would mean for your community

***As these are drop-in sessions members of the community can attend at any time, within the allotted slot, and stay for as long or as little a period of time as they wish.***
